| User Experience | Negative |
| Provisional App Grading* | Elementary |
| Technical Must Fix Issues | 7 |
| Design Must Fix Issues | 3 |

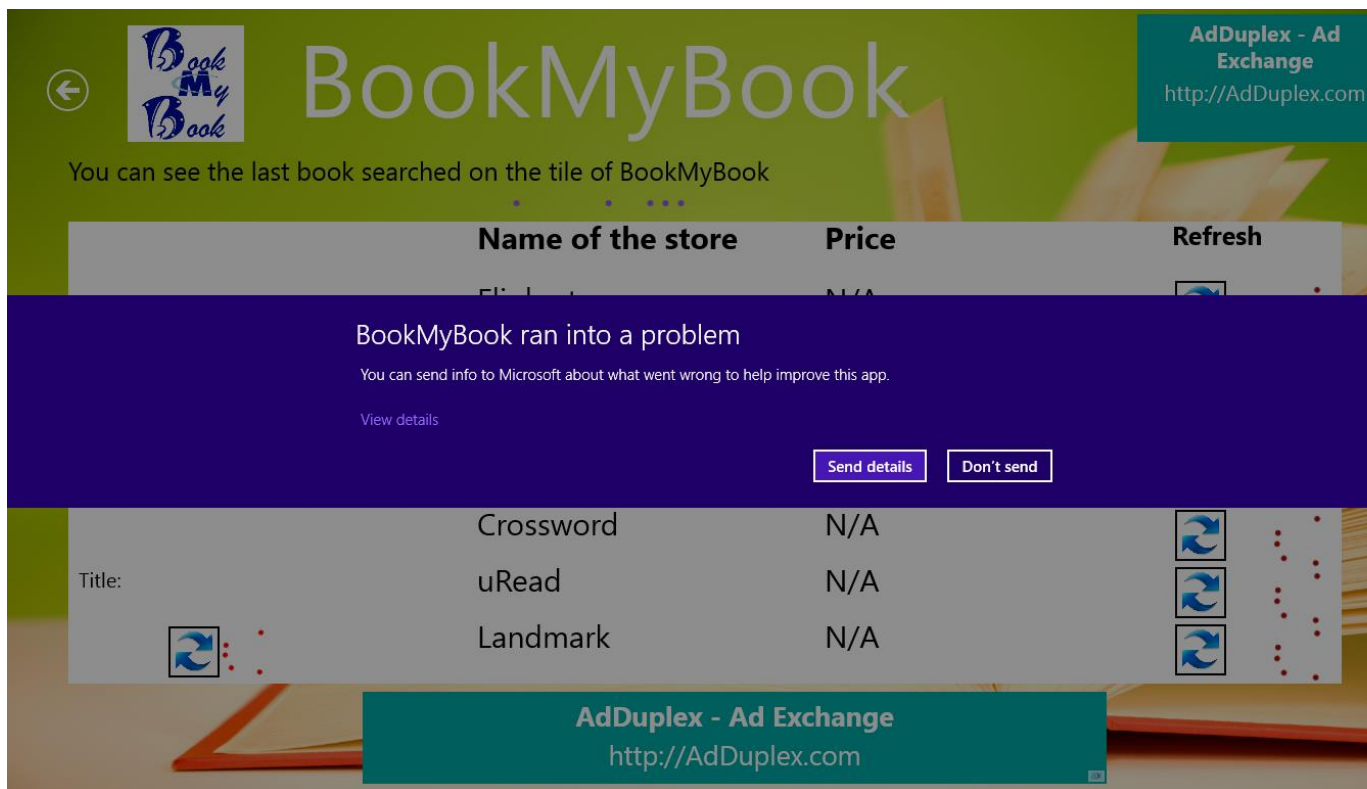

Detailed Report

1. User Experience Related Issues

- Give 20 pixel left and bottom margin in the start page.
- Give 20 pixel left and right margins in item page.
- APP SCREEN- The appearance of the screen should be modified to give a better appearance. See <http://msdn.microsoft.com/en-us/library/windows/apps/dn263201.aspx>. Also see 'Related topics' at the bottom of this webpage.

2. Technical Issues/Bugs

- Handle the snap view and filled view properly, Give a fuller background to both the views.
- CRASHES/SUSPEND/RESUME- The Application should resume to its original state after suspension. For Guidance see <http://msdn.microsoft.com/en-us/library/windows/apps/hh465088.aspx>. Also see 'Related topics' at the bottom of these webpages, see the following screen shot:

- The back button on the item page is not working.
- On click of submit the page gets navigated to item's page and the page loads for a longer time and crashes.
- The horizontal scroll bar does not work on using mouse wheel.
- On mouse enter the text in the text box must be cleared.
- The multi select list box does not work properly.

3. Recommendations

- #1 Remove the submit button from the start page.
- #2 Minimise the submit button in the bottom app bar.
- #3 Give a transparent logo.

* This grading is provisional for testing and review purposes and may change after being analysed by the In-Store-Apps review team
